WHAT IS THE PHYSICIAN PAYMENTS SUNSHINE ACT?

Signed into law in 2010 as part of the Affordable Care Act, the Physician Payments Sunshine Act (the “Sunshine Law”) requires manufacturers, including certain distributors, of medical devices, drugs, biologicals, and medical supplies to track and report certain payments made to and transfers of value provided to physicians and teaching hospitals.

The Sunshine Law also requires manufacturers and Group Purchasing Organizations (GPOs) to report certain ownership and investment interests held by physicians and their immediate family members.

WHY WAS THE SUNSHINE LAW ENACTED?

The main purpose of the Sunshine Law is to provide patients with enhanced transparency into the relationships their health care providers have with life science manufacturers, including medical technology companies. It’s important to note that the Sunshine Law does not restrict industry-physician collaboration or interactions, or prohibit payments or transfers of value. ***Rather, it requires tracking and reporting of payments and transfers of value that result from these interactions.***

Value of Industry-Provider Collaborations

Collaboration and interactions between medical technology companies and health care providers are essential to advancing new, safe and effective medical technologies that benefit patients. AdvaMedDx recognizes that this goal must be balanced against the obligation of health care providers to make independent decisions regarding the care and treatment of their patients. AdvaMedDx and its member medical technology companies are committed to transparency with patients about interactions between providers and industry. For this reason, AdvaMedDx supports the Physician Payments Sunshine Law.

Many AdvaMedDx member companies have certified to compliance with the AdvaMed Code of Ethics on Interactions with Health Care Professionals which also supports ethical collaborations. It is by driving ethical collaborations that we help protect patients.

HOW CAN I WORK TOGETHER WITH MEDICAL TECHNOLOGY COMPANIES TO PROMOTE ETHICAL COLLABORATION?

AdvaMedDx and its members support the transparency goal of the Sunshine Law to ensure that health care professionals, like you, continue to make independent decisions regarding the health care and treatment of patients and the development and improvement of medical technology. You can work with us to promote strong standards in all interactions with industry. Medtech companies can assist you in educating your colleagues and patients about the requirements of the Sunshine Law. Important elements to remember include:

- Industry collaboration with health care professionals is necessary to promote the safe and effective use of medical technologies as well as design innovative and advanced technologies;
- Your patients and other stakeholders may not understand the benefits of industry collaborations with health care professionals, and how and why such collaborations may result in bona fide payments and transfers of value and the need to make such payments public;
- The specific information that is required to be reported by manufacturers that will be publicly available on the Internet;
- The importance of working with manufacturers to promote the accurate capture, tracking, auditing and monitoring, documentation and reporting of information to ensure maximum compliance with the Sunshine Law, as most of the information will be published by CMS onto a public website.
